PEOPLE LEADERSHIP · FRONTEND ARCHITECTURE

I build teams — and the frontend platforms they ship on.

9+ years in tech, from developer to team lead. I combine servant leadership with hands-on architecture to grow high-performing, self-governing teams that deliver at scale.

A strong believer in transparency, feedback, coaching and mentoring — and in letting people step up and watching them grow.

Where I've made an impact

Engineering FE Team Lead @ Betsson Group

`Aug 2022 – Present · Sweden · Distributed team`

- Lead a **distributed team of 8 frontend developers**, fostering a high-performing remote environment.
- Spearheaded a **micro-frontend architecture with StencilJS**, improving code maintainability across products.
- Oversee robust frontend solutions in **Angular, TypeScript and JavaScript**, reducing bug reports.
- Established and track **team OKRs**, achieving a high percentage of objectives.
- Own technical interviews and onboarding, attracting and ramping up top remote talent.
- Run regular 1:1s and contribute to performance reviews, improving satisfaction and growth.
- Champion code quality through reviews, testing and CI/CD, steadily decreasing technical debt.
- Partner with POs/PMs across time zones for smoother sprints; research and introduce new technologies.

Team Lead @ Daniel Wellington

`Feb 2022 – Aug 2022 · Stockholm`

- Supported, mentored and coached teams and scrum masters to become high-performing.
- Facilitated activities to discover and improve ways of working; secured long-term quality and delivery.
- Held regular 1:1s with direct reports and helped build trust inside teams.
- Enabled knowledge sharing across teams and locations; provided technical feedback to the business.

Full-stack Developer @ Daniel Wellington

`Sep 2021 – Aug 2022 · Stockholm`

- Designed, developed and maintained the **Daniel Wellington e-commerce** platform with React and Angular.
- Built **event-driven, serverless services** on AWS with CI/CD via AWS CodePipeline.

- Developed infrastructure as code using **CloudFormation** and the Serverless Framework.
- Built an internal control dashboard with React and AWS Amplify.

Frontend Developer @ Betsson Group

`Sep 2017 — Sep 2021 · Stockholm`

- Built the frontend platform powering **Betsson, Betsafe, NordicBet, Mobilbahis and Bets10**.
- Developed an adaptive architecture: separate mobile and desktop Angular apps sharing common libraries, served by Node and .NET MVC backends.
- Worked on back-end services in C#, ASP.NET / .NET Core and Web API, tested with xUnit and xBehave.
- Ensured web standards, SEO, usability and browser compatibility; rotated as Scrum Master.

Computer Center Staff @ Hellenic Navy

`Oct 2012 — Sep 2013 · Greece`

- Member of the staff of the organization's computer center.

What I bring to the table

Leadership

People management · Building leadership teams · Servant leadership · Coaching & mentoring · Agile / Scrum · Lean · OKRs · Technical hiring · Remote teams

Frontend

Angular · TypeScript · JavaScript · React · StencilJS · Micro-frontends · HTML5 · SCSS · Accessibility · SEO

Backend & Cloud

Node.js · C# / .NET Core · ASP.NET MVC · Web API / REST · AWS · Serverless · CloudFormation · AWS Amplify

Quality & Delivery

Jasmine · Karma · Protractor · xUnit · CI/CD · TeamCity · Octopus Deploy · Sentry · Splunk · Git

Recognition & education

`LEADERSHIP CERTIFICATION`

Team Captain Program Certificate

Leadership development program focused on building and leading high-performing teams.

`2011 — 2017`

BSc in Computer & Informatics Engineering

Department of Computer & Informatics Engineering · Computer Software Engineering
